marioandres.1996@icloud.com

Quito - Ecuador

**Hi!,**

As a lover of technologies, I introduce myself as an information technology engineer, having completed my studies at the Pontifical Catholic University of Ecuador. During my academic life I had the opportunity to gain technical and administrative experience from a public institution, as well as from the university itself that opened the doors for me to gain work experience within its departments. In the same way, taking advantage of certain free times, I did a series of courses that help my training.

I feel especially motivated to be part of a team for the development of IT skills. As a young university graduate, I feel free to absorb all the experience that can be provided to me and thus improve my skills and knowledge, always maintaining my values acquired during my years of life.

Sincerely,

**Mario Andrés Muñoz**
